- Web Developer**
- Xenosis IT Solutions*
- Gained hands-on experience in web development by working on various projects involving the design, development, and maintenance of websites and web applications.
- Data Science**
- acmegrade*
- Contributed to data analysis and predictive modeling projects as a Data Science Intern.
- Paper Publication**
- IRJMETs*
- This project is an IoT-based health monitoring system designed to continuously check the real-time health parameters of a patient and display the data on both mobile devices and computers using wireless technology.

Chetan Chaudhari

Full Stack Web Developer

Professional Summary

Dynamic and committed full stack web developer with a B.Tech degree, skilled in MERN stack (MongoDB, Express.js, React.js, Node.js), and adept at creating scalable web applications. Proficient in using and integrating Generative AI, and quick at learning new technologies. Enthusiastic collaborator with strong problem-solving skills.

Experience

- Xenosis IT Solutions**

| Web Developer

July 2024 - August 2024
- Collaborated with product managers, designers, and developers to translate project requirements into functional web applications using React.js, Node.js, Express.js, and MongoDB.
 - Designed and developed efficient server-side APIs and ensured seamless integration with frontend components, resulting in robust and scalable applications.
- acmegrade**

| Data Science

September 2023 - October 2023
- Designed efficient data processing workflows, integrating multiple data sources for comprehensive analysis.
 - Stayed current with industry trends and best practices, applying the latest methods to data analysis and project development.

Projects

E-commerce Web Application [Live Demo Link](#) [Github Repo Link](#)

- HTML5
- CSS3
- JavaScript
- Node.js
- Express.js

Responsive Web Design

- Fetched and displayed products from the Fake Store API, showcasing details like images, prices, descriptions, ratings, and titles.
- Implemented product sorting functionality based on user preferences to enhance user experience.

RESTful API for To-Do List Management [Github Repo Link](#)

- JavaScript
- Git
- Node.js
- Express.js
- RESTful APIs

File System (fs) Module

- Created a RESTful API with Express.js for managing a ToDo list, enabling CRUD operations on ToDo items.
- Stored ToDo items in a JSON file and managed operations using the File System (fs) module.
- Designed various endpoints to fetch, add, update, and delete ToDo items based on unique IDs.

Weather Application [Live Demo Link](#) [Github Repo Link](#)

- JavaScript
- RESTful API
- Git
- HTML5
- CSS3

Responsive Web Design

- Developed a weather web application using HTML5, CSS3, JavaScript, Node.js, and Express.js.
- Fetched and displayed current weather data from an external API based on user-entered city names.
- Implemented dynamic webpage updates to show current, maximum, and minimum temperatures.
